

EURO-COLOR

Highly-concentrated, non-fading acrylic paint for airbrushes.

The range consists of 24 brilliant colour hues distinguished by the particular purity of the tones. All tones (15 transparent and 9 opaque) can be mixed with each other and thinned if desired.

EURO-COLOR paints can be applied to canvas, paper, cardboard and textiles. They are also ideal for use as watercolour paints and for retouching photos.

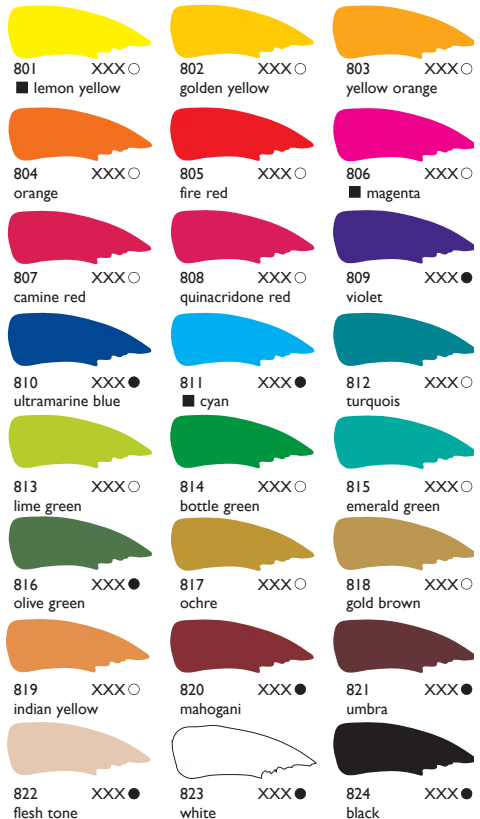

They adhere excellently to plastic and metal, making them ideal for model construction applications.

The paints are available in practical 32 ml bottles with an integrated drop dispenser.

We also recommend our No. 850 liquid masking film for masking applications, along with the No. 860 cleaner for cleaning airbrushes (both 85 ml).

Our range also includes our No. 861 thinner (32 ml).

- Transparent
- Totally opaque coating
- XXX Maximum resistance to fading
- Primary colours (basic colours)
